Rationalizing Pharmaceutical Business Processes with SAP S/4HANA®

Our infection control solutions cater to various industries such as Pharmaceutical Industry, Food Industry, Veterinary Industries, and Communities. Our processes involve the use of state-of-art technologies and latest processes to keep pace with demands of an ever-growing industry. We pride ourselves on having created the most loyal, qualified and professional team over a period of time. Our products answer the global and growing need for the best-in-class solutions. Over time, Sirmaxo has become a trusted name synonymous with risk reduction and safety in clinical environments across the globe.

Before: Challenges and Opportunities

- Dependency on multiple business software without integration
- The crucial activities of production and QA/QC were not captured in the prior ERP system.
- Maintain efficient check and control over the inventory with manufacturing and expiry date.
- Non efficient Integration of operation between logistic, Quality and finance.

Why SAP

- Scalability to accommodate strong growth with implementation of GMP/best practices.
- Extensibility to fold in the ERP systems of global subsidiaries
- Support for an upgraded Web presence to improve interaction with customers
- Establish efficient
- Expertise to further leverage the Internet of Things and machine learning, as new applications emerge.
- Personalized support from the SAP Early Adopter Care program team.

After: Value-Driven Results

- Automated record keeping to increase repeatability of positive outcomes
- Material and batch traceability for internal visibility and compliance with industry and government regulations
- Simplified monitoring and insight delivery across functions through SAP Fiori launchpad
- Tighter processes for costing of expensive product components to understand product margins
- Faster response times for new orders and service issues to raise customer satisfaction

From a simple beginning, Sirmaxo has grown to become the leading infection control solutions provider. **Our aim is to remain as a pioneer of the industry, developing and integrating the most advanced methods and technologies for ultimate customer satisfaction.**
